Individual and Family Counseling

Clients will meet weekly with their Primary Therapist throughout our IOP and OP programs. Each client is encouraged to include loved ones in their treatment. Addiction is a family disease and Liberty Wellness understands that all are affected. We are here to assist with re-establishing healthy relationships and boundaries through family therapy sessions.

OUR SERVICES

Outpatient Counseling

Outpatient Counseling (IOP) allows for our clients to get back to a normal routine and continue with life's daily commitments, such as work, school and caring for a family. Returning to a structured and healthy lifestyle is important in recovery. We offer a flexible IOP schedule to fit the needs of our clients, with day or evening programs Monday through Friday.

Wellness

Liberty Wellness incorporates all aspects of life to treat the whole person. We incorporate a holistic approach to consider how factors such as lifestyle, environment, health, and co-occurring mental health disorders may play a part of the addiction. We encourage all of our clients to participate in our wellness activities to promote physical, mental and emotional health.

Medical

At Liberty, our medical staff completes a full Psychiatric Evaluation with each individual we treat. Through this assessment and work with our treatment team we evaluate if medication would assist in the treatment process. Proper medication can help clients who suffer from Anxiety, Depression, Bi-Polar disorder and others.
