

KINDER GROWTH
DIRFLOORTIME THERAPY

DIR/FLOORTIME THERAPY

**Now fully covered by Medicaid in New Jersey
For those with an autism diagnosis**

WHAT IS DIR/FLOORTIME?

Floortime is a relationship-based therapy for children with autism. The intervention is called Floortime because the therapist gets 'down on the floor' to play and interact with the child at their level. The goal is to meet each child at his/her developmental level and build on their strengths. The child maximizes his/her potential through 'circles of communication, and warm supportive caregiver relationships.
